

Associate Engineer (XML C# .Net) (1 Contingent Staff Worker)

Description

We are hiring an associate level .NET software engineer to work on a project to develop solutions to manage the Clients's digital text conversion and production. The Clients has need for a talented individual to help develop software that converts and manages text in many languages from many formats to an XML base. This position will work primarily to help in the creation of applications and tools which will enable the Clients to engage and leverage Clients membership in assisting with the content review, categorization, and enrichment needs that exist. We are seeking individuals who are excited about working to deliver high quality, scalable software solutions. **This position is contingent. It is anticipated to last 6 -12 months with the possibility of conversion or renewal up to 2 years.**

This position will utilize the following technologies (but not limited to):

- XML
- C#
- .NET Framework 3.5 SP1
- Windows Presentation Foundation (WPF)
- LINQ
- TFS
- XQuery a plus
- Microsoft Office Add-in development a plus

Qualifications

Requirements:

- Strong technical aptitude.
- Strong communication and problem solving skills.
- Experience developing frameworks or similar API work preferred.
- Solid understanding of enterprise system and application design
- Should have at least some hands-on exposure to the technologies listed, 1 - 3 years of relevant experience required.
- BS/MS/PhD in CS or equivalent.
- C# skills and object oriented design experience.
- Experience in XML and its querying methods (preferably XQuery)
- Experience with Marklogic, Adobe InDesign, and Adobe Creative Suite desired.
- Knowledge agile development methodologies desired.
- PROBLEM SOLVERS: Ideal candidates will be those that can willingly work from any new platform, eagerly become an expert, and find/create solutions to the problems they face.
