

Project Manager

Description

We are hiring a Project Manager to work on a project to develop solutions to manage the clients digital text conversion and production. The client needs to move all of its text based content to a standard form (XML) which can then be delivered through many old and new media types and channels.. Understanding of XML and some awareness of language text publishing desired. We are seeking individuals who are excited about working to deliver high quality solutions. **This position is contingent. It is anticipated to last 5 -12 months with the possibility of conversion or renewal up to 2 years.**

This position will operate within established methodologies, procedures, policies and guidelines. Eagerness to solve complex problems with professional techniques and proven principles. Willingness to engage closely with team and customers alike to create a valuable working experience for all. We need people that can focus on delivering high-quality solutions, quickly.

Qualifications

Requirements:

- Strong technical project management aptitude.
- **Strong communication** and problem solving skills.
- Solid understanding of enterprise system and application design
- 5 - 8 years of relevant technical project management experience required.
- BS required, MS/MBA/PhD preferred.
- PMP certified.
- Knowledge of XML development and XQuery desired.

- Experience with Marklogic, Adobe InDesign, and Adobe Creative Suite desired.
- PROBLEM SOLVERS: Ideal candidates will be those that can willingly work from any new project, eagerly become an expert, and find/create solutions to the problems they face.
