

Sr. Software Engineer _Java / Vignette

Description

We are hiring a Sr. Software Engineer to help design and code web-based applications.

This individual will work on a team developing applications supporting various departments. Qualified candidates must be able to work on a highly-productive team pushing toward aggressive schedules. This engineer will need to be comfortable with AGILE and collaborative development processes. Also must have the ability to rapidly investigate and evaluate new technologies, and implement them into sound architectures.

Ultimately, the success of the individual engineer is directly tied to the success of the engineering team. We need people that can focus on delivering high-quality solutions on time.

Qualifications

Candidates for this position are expected to have the following qualifications:

- Experience with designing and architecting web applications.
- Expert in java development including Java EE technologies.
- Strong communication and problem solving skills.
- Bachelor of Science (BS) in Computer Science (or closely related degree).
- Must have 8+ years of relevant industry experience.

The ideal candidate will also have experience with the following technologies:

- Spring
- Hibernate / JPA
- Ajax
- Web Services
- JUnit or TestNG
- Maven2
- Tomcat
- Java Taglibs
- JSP
- Vignette Content Management
- MarkLogic
- Subversion
