

# **Looking for a Senior Systems Administrator. A UNIX/Linux expert. The best of the best.**

## ***Job Description***

- Work closely with architects in designing enterprise class solutions based on the principles of redundancy, data integrity, security and recoverability.
- Integrate and implement server solutions and server components such as proxy servers, web servers, application servers, core infrastructure services (Proxy, DNS, SSH, SMTP, Sendmail, etc), and others.
- Engineer solutions to meet customer requirements based on current and future server platforms.
- Draft, update and follow best practices and standards documentation.
- Coordinate and perform maintenance activities in a large environment composed of a mix of different UNIX and Linux platforms and configurations.
- Trouble-shooting hardware, software and network related problems.
- Perform performance analysis and tuning for servers hosting large databases and other OLTP systems.

## **Qualifications**

### ***Job Qualifications***

- Bachelor's degree in Math, Computer Science, Information Systems, or related field.
- Minimum of 8 years of progressive UNIX/Linux system administration experience.
- Experience with administration of AIX, Linux and Solaris a plus.
- Excellent UNIX performance tuning and analysis skills.
- Strong skills administering UNIX server systems utilizing SAN technologies.
- Experience with virtualization technologies (VIO, ESX) a plus.
- Six years experience in designing, implementing and supporting highly secure architectures.
- Strong network skills with TCP/IP, RCP, routing, proxy servers, IP load balancing required.
- Extensive knowledge of web technologies, operating systems, computer architectures and proven experience as a system administrator.
- Ability to communicate clearly and concisely. Capable of producing quality documentation.
- Good customer relationship skills.
- Innate understanding of the value of establishing and living efficient processes.
- Ability to adapt and learn new concepts and new software products.
- Able to work under stress and handle multiple critical priorities.
